study of pharmacognosy and the use of medicinal plants. Plants have been the basis for medical treatments through most of human history, and such traditional medicine is still widely practiced today. Modern medicine makes use of many plant-derived compounds as the basis for evidence-based pharmaceutical drugs. ...

Herbal medicine - Wikipedia

Ethnomedicine mostly used behavioural changes to diagnose. Further, cure of the disease also involved, in most of the cases, an entire village or a group of people. However, with the influence of allopathic medicine, ethnomedicine also started identifying diseases with the same name as modern medical science.
