Hisense International - Hisense

From time to time, updates to the built-in computer's software (known as "firmware") are developed by Hisense. These firmware updates can enable new features, improve the usability of existing features, and even fix annoying bugs. However, if the wrong firmware is installed, or is not installed properly, your television can stop working.

How can I get the latest firmware for my TV?

To update Hisense TV firmware, you'll need to navigate to the main settings screen. Do this by pressing the button that looks like a cog on your Hisense remote. Go to All, then navigate to About, and, finally, to Software Update. Use Detect to check if you have the most recent firmware version and to install the latest firmware if not.
