The purpose of the Care Redesign Guide is to offer a structured improvement process for redesigning care for people with complex needs and high healthcare costs. The Redesign Guide is for people who want to improve health outcomes for individuals with complex health, behavioral, and social needs and with high healthcare costs.

### Care Redesign Guide

Health care/system redesign involves making systematic changes to primary care practices and health systems to improve the quality, efficiency, and effectiveness of patient care. Frameworks, models, and concepts such as the Chronic Care Model and the Patient-Centered Medical Home (PCMH) can be used independently or together to reorganize care delivery for the purpose of improving patient outcomes.

Patient-Centered, Data-Driven, Coordinated Care. Through clinical care redesign efforts, Mass General Brigham aims to improve access to and coordination of care for patients, and ultimately, reduce the need for unnecessary and high-cost interventions. This approach for managing patients is especially important for those with chronic conditions or heightened risk factors that, if not closely managed, can spiral into acute, high-cost episodes of care.
