The Invention Of Science A

David Wootton argues that the discovery of America demonstrated new knowledge was possible: indeed, it introduced the very concept of discovery and opened the way to the invention of science. The first crucial discovery was Tycho Brahe's nova of 1572: proof that there could be change in the heavens.

The Invention of Science | by David Wootton

"David Wootton's The Invention of Science is outstanding. It details how, when and why the philosophical, intellectual and practical frameworks of modern science arose, and it sees off relativism in the process. While dealing wonderfully in broad sweeps, it offers a wealth of entertaining details." (Richard Joyner, Times Higher Education)
